RE: Community Connectors

To Whom It May Concern:

I am writing in support of the **Students Talents Achieving Results (STAR)** mentoring initiative. Mentoring is a proven strategy to transform the lives of young people. Students who have a caring adult to guide them are more likely to stay in school, go to college and/or obtain a rewarding career. Mentoring is a key to unlock the true potential of young people today and guide them to a successful adulthood.

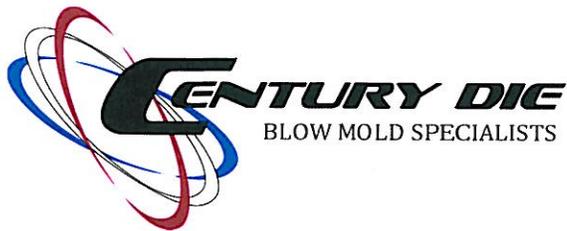

Through the STAR initiative, community mentors from business and industry, post-secondary and higher education, and community and faith-based organizations will assist young people develop the tools they need to become the leaders of tomorrow by spending time with and learning from established professionals within our communities. In particular, our business is impressed with the career-focused STAR mentoring initiative which includes introducing the youth to the “world of work” that may not otherwise be available to them. Through the career exploration activities proposed, the program will help youth to build employment skills, such as professionalism, communication, critical thinking, problem solving and interpersonal and “work ready” soft skills.

The STAR initiative proposed by WSOS Community Action Commission, Inc. (WSOS) in collaboration with Lakota and Gibsonburg School Districts, Sandusky County Economic Development Corporation, Big Brothers Big Sisters, and many faith-based organizations will assist in connecting our business with students prepared to enter the workforce.

Please give full and fair consideration to this proposal. Northwest Ohio is experiencing tremendous business and industry growth. WSOS, along with the Sandusky County Economic Development Corporation, is an experienced and committed partner in providing strong workforce development strategies for individuals and families. I support the collaborations effort to meet the needs of employers.

RE: Community Connectors

To Whom It May Concern:

I am writing in support of the Students Talents Achieving Results (STAR) mentoring initiative. Gibsonburg Exempted Village School District is committed to raise awareness for career pathways for our students and their parents. Our district is committed to providing a career education curriculum that will help students and their parents make educated decisions involving the career pathway in demand by employers in Sandusky county and Ohio. Additionally, by engaging our community with our mission through this mentoring program, the partnership increases our students' assets that empower students to create an education plan that will lead them to a rewarding career after they graduate. We believe mentoring is a proven approach to enrich and support the lives of young people as they matriculate through middle school, to high school to graduation and beyond. When schools take a meaningful role in connecting caring adults with better informed students, the likelihood of developing a resilient student, who will overcome barriers or obstacles to stay in school, go to college and/or obtain a rewarding career increases. Mentoring is instrumental in helping students build efficacy for their future as responsible citizens in the Gibsonburg community.

The STAR initiative proposed by WSOS Community Action Commission, Inc. (WSOS) in collaboration with Lakota and Gibsonburg School Districts, Sandusky County Economic Development Corporation, Big Brothers Big Sisters, and many faith-based organizations will assist in connecting our business with students prepared to enter the workforce.

Therefore, unequivocally our school district fully supports this encouraging initiative.

Sincerely,

Dr. Jose Hernandez, Ed.D.
Superintendent of Gibsonburg Exempted Village Schools
