

Alexis Trevino
CBI Student Focus Learning Academy East
October 18, 2013

My name is Alexis Trevino and I'm 18 years old and a current student at Focus Learning Academy East. I'm currently enrolled in the CBI (Career Based Intervention) program learning about job readiness and college prep skills. In addition to this, I had the opportunity to visit the multi-media lab and totally feel in love with the music studio. I feel this is would be a great enhancement to our school.

I have been interested in music since a little girl (age 7). I would love to use the lab to help me produce music, make beats, create lyrics, and work with others who share the same interest in music. Music motivates me to get more school work done. I stay focused and concentrate on my work more.

After I graduate, I plan to go to college and double major in music composition and vocals. Being able to utilize the multi-media lab could help give me hands-on experience and help prepare my portfolio for entrance to college.

If focused offered the multi-media class I would definitely attend. I would also be willing to come back and volunteer after graduation. I love to see students with a passion for music.

As a parent – I sing to my daughter all the time – she smiles and giggles – music is a calming tool – when I'm upset or depressed music helps me calm down.
