To Whom It May Concern;

This letter is to provide documentation of full support for the construction and development of the Darke County Manufacturing Training Center outlined in the Greenville Local Schools Straight A grant application. As the education representative on the Darke County Partnering for Progress Executive Board, I recognize the necessity of a more skilled workforce for the economic development of the region. As Superintendent of two affected local school districts, Ansonia and Mississinawa Valley Local Schools, I realize that there is tremendous value to my schools and my students in offering a career technical option that is located closer to home. Not having to travel two hours a day for technical training will encourage more students to participate and thus increase earning potential. Having students stay in their home school for half a day and their technical school half a day would save both of my districts money while at the same time keep students connected to their classmates and schools. Furthermore, the future of my schools is dependent on the future of local industry and employees that work there. It is critical for schools and industry to work cooperatively to maintain and grow the economic potential of the County.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Atchley".

Jim Atchley, Supt.
