Straight A Grant Reader;

I am supportive of the construction and development of the Darke County Manufacturing Training Center to be located at the current Greenville Career Technology Center. The need for a more skilled workforce particularly in the area of advanced manufacturing is of concern to me for many reasons. My mission is to insure all students are "college and career ready" as they exit my schools and I realize acquiring a skill will increase that potential. I am also concerned because the biggest employer in our district, Midmark-a worldwide supplier of medical equipment, is in need of qualified employees. The success of Midmark affects many of the students and families I serve and therefore I am committed to any educational programs that will assist them in maintaining and growing their largely manufacturing business. It is my belief that once this center and accompanying educational program is operational, that Versailles Exempted Local Schools and students will benefit.

Sincerely,

Aaron Moran
Versailles Exempted Village Schools.
