DESCRIPTION OF NATURE OF PARTNERSHIP

A partnership is an association between a grant applicant and educational stakeholder(s) in which the stakeholder agrees to provide human and material assets or access to academic and administrative resources to the grant applicant to develop or execute a Straight A Fund grant application. However, in a partnership, only the grant applicant is responsible for ensuring the grant is developed and executed according to the terms of the grant agreement with the Straight A Program Governing Board. Grant applicant partners are responsible only to the extent provided in their Partnership Agreement with the grant applicant.

In order to ensure the effective implementation of the Straight A Fund throughout the state, applicants are encouraged to partner with education stakeholders. Each applicant must identify its partners and attach a description of each respective partner’s roles and responsibilities.

Each member of the partnership is responsible for the following assurances:

1. Be knowledgeable about the applicant’s Straight A Fund grant proposal and application, including advocacy of the Straight A Fund program.
2. Maintain familiarity with the partner’s services to enhance the proposal, including specific goals and practices.
3. Demonstrate a commitment to clear roles and responsibilities of each partner as it relates to the grant proposal and application.
4. Sustain consistent communication among partners and stakeholders with a shared vision of the goals of the grant proposal. This includes participating in regularly scheduled meetings for project management and identifying areas for improvement.
5. Ensure partners have appropriate access to data for purposes of grant program improvement and evaluation in accordance with state and federal law.
6. Develop a clear project management plan to sustain the project over time.

To: "Swanger, Misty" <swangemi@japioneers.org>

Dr. Swanger,

Please find attached a signed partnership agreement and a document detailing the estimated project costs. These numbers could be higher if you are required to use different vendors. It is also possible that a grain silo will not be able to be utilized and a second tower would be needed. In that case, you can double the tower construction cost, and remove 2 of the radios. The tower construction cost are strictly for a tower and do not include any costs related to building a small building at the base of the tower, known as a "hut", that would probably be required if you were to try and lease tower space to anyone other than a small, independent fixed wireless service provider. Based on the costs involved, I do not think that it would be worth it to try to lease space on your tower.

I have also reviewed the Straight A Fund Application, but I am not sure what I can do to help you with that.

If you have any questions, or would like some input on your application, please let me know. Due to the short time frame, you can call me directly at 614-203-5449.

I hope that your project is approved and I look forward to meeting with you again.

Thanks,
Jon Trickey
Johnathon Alder School District school network connection budgetary numbers

This is for a 1.4 Gbps total throughput (approximately 750 Mbps each direction simultaneously) to Monroe Elementary School and Cannan Middle School, each connecting back to the Junior High School. Based on preliminary modelling, it should be possible to create a wireless connection from Monroe Elementary and the Junior High School by using one of the many grain elevators in the area and building a tower at Monroe Elementary. The Junior High should not require a tower, but may need a 20’ mast. Cannan Middle School should also only need a small mast to connect back to the Junior High School. This does not include any costs associated with connecting the wireless network to the existing network.

Radio Equipment:
   6 Ubiquiti airFiber 24 radios - $1500 each [http://www.ubnt.com/airfiber#airFiberHardware]

100’ Tower at Monroe Elementary School:
   $20,000 installed for a new tower. This cost can vary quite a bit depending on the type of tower and how it is installed. A used tower can be significantly cheaper.

Installation of radios at each school and cable runs:
   $5,000 total

Total project cost estimate:
   $34,000

Maintenance estimates:
   $1,000 / year for tower and radio at Monroe Elementary and $500 / year for each remaining radio. This should cover the cost to adjust the radios and build up a reserve to replace any radios that fail.
   $500 / year for grain silo lease.
   $4,000 / year total.
