

Mr. Stan Jennings, Superintendent  
Scioto County Career Technical Center  
951 Vern Riffe Dr.  
Lucasville, OH 45648

Dear Mr. Jennings:

Southern State Community College is delighted to be partners with the Scioto County Career Technical Center for participation in the Seniors-to-Sophomores program. The College is willing to commit to the following:

To accept up to a total of twenty-five qualified high school students for the program for Academic Year 2013-2014. Southern State currently discounts its tuition by a minimum of 20% for other grant funded dual enrollment programs, and we are willing to continue this during the academic year.

To offer sections of selected general education classes that meet the dual credit needs of student participants, if not offered by other partnering institutions.

To engage in curriculum mapping of career/technical programs for articulation into associate degree programs

To participate as an active partner in planning sessions for future years.

To assist in the development of a sustainability model that is mutually acceptable to all partners.

Southern State Community College has a long history of established and successful partnerships with our local school district, and we look forward to building on this new collaborative effort with Scioto County Career Technical Center. It is our hope that as a result of this partnership, through the Seniors-to-Sophomores program, higher education will become more of a reality for our area students.

Respectfully,

Dr. Ryan McCall  
Vice President of Academic Affairs
