Stacy Parr
Technology Director
Springfield City School District
1500 W. Jefferson St.
Springfield, OH 45506

Dear Ms. Parr,

I write to offer a letter of support to accompany Springfield City School District's proposal for the Straight A Grant. I understand that this letter is a non-binding expression of an understanding, and is not intended as a contract or other legally binding document.

I understand that the purpose of the district's proposed program is a digital learning deployment where teachers and students have access to mobile devices at all times and receive professional development on how to use those devices.

Should Springfield City School District receive funding for its application, Apple agrees to provide support in the following ways:

- Provide input and guidance on project design and goals based on anticipated utilization of Apple technologies
- Recommend content creation and distribution solutions via Apple products and services (e.g. iOS apps and iTunes U)
- Provide technical assistance in support of project planning
- Recommend and provide guidance on training and course material development that support project goals (e.g. iOS development; Logic; Final Cut Pro, etc.)

For more than 30 years, Apple has been the leader in educational technology products that empower teaching and learning. From schools to states, Apple has worked to promote improved student learning through innovative hardware and software technologies, professional development and professional services.

We look forward to working with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Janet Rosebrock", is written over a light blue horizontal line.
