

Delphos City Schools Business Partnership Program

Whether you are an individual who wants to be involved with a school project or event, or a business whose resources could benefit students throughout the district, your commitment and support of our students is needed now more than ever. Delphos City Schools is excited to partner with you for success.

WHAT DOES A BUSINESS-SCHOOL PARTNERSHIP MEAN TO YOU?

The benefits are significant. You may give of your time, talent, energy, and/or resources. Your company will gain public awareness as a business that cares about the quality of education in Delphos. In addition, this partnership will be a great morale booster for your employees by showing them they have made a difference in a child's life. People like doing business with businesses that support the future of our society.

THE GOAL?

To build a bridge between the education and business community that expands learning opportunities and matches community resources to identified needs of the school system.

The economic well-being and desirability of a community are tied to the quality of its public education. Good education is good for business. Business-School partnerships improve the residents' perceptions of the positive impact of business and education in the local community.

School curriculum must be adjusted to reflect the skills that every student will need to enjoy satisfying, productive employment experiences and to face the challenges in the workplace. Schools need to have real-world settings through which students can develop and pursue meaningful career and education plans after high school.

By working closely with schools, businesses can ensure that future members of the workforce are well-prepared to function in high-performance workplaces--environments that demand teamwork, problem-solving, and complex reasoning skills.
