

### DESCRIPTION OF NATURE OF PARTNERSHIP

A partnership is an association between a grant applicant and educational stakeholder(s) in which the stakeholder agrees to provide human and material assets or access to academic and administrative resources to the grant applicant to develop or execute a Straight A Fund grant application. However, in a partnership, only the grant applicant is responsible for ensuring the grant is developed and executed according to the terms of the grant agreement with the Straight A Program Governing Board. Grant applicant partners are responsible only to the extent provided in their Partnership Agreement with the grant applicant.

In order to ensure the effective implementation of the Straight A Fund throughout the state, applicants are encouraged to partner with education stakeholders. Each applicant must identify its partners and attach a description of each respective partner's roles and responsibilities.

Each member of the partnership is responsible for the following assurances:

1. Be knowledgeable about the applicant's Straight A Fund grant proposal and application, including advocacy of the Straight A Fund program.
2. Maintain familiarity with the partner's services to enhance the proposal, including specific goals and practices.
3. Demonstrate a commitment to clear roles and responsibilities of each partner as it relates to the grant proposal and application.
4. Sustain consistent communication among partners and stakeholders with a shared vision of the goals of the grant proposal. This includes participating in regularly scheduled meetings for project management and identifying areas for improvement.
5. Ensure partners have appropriate access to data for purposes of grant program improvement and evaluation in accordance with state and federal law.
6. Develop a clear project management plan to sustain the project over time.

Partnership Agreement Addendum  
Roles and Responsibilities  
For Participating School Districts

Apollo Career Center, along with its industry partners, will create a 'Mobile Fab Lab' for the purpose of initiating hands-on, project-based STEM activities for middle school students. Objectives of the Project include an increase in student awareness and interest in manufacturing career pathways, exposure to new technologies utilized in the manufacturing industry, and student engagement using industry-standard equipment in a hands-on environment.

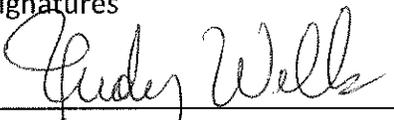

The Mobile Fab Lab will include the following machinery and equipment: Laser Engraver System, 3D Printer System, CNC Milling System, CNC Lathe System, and a Robotics Workcell.

Responsibilities:

I/we agree to the following responsibilities in relation to supporting this project:

1. Provision of space and a designated location required for the Mobile Fab Lab, with access to required electrical utilities.
2. Formation of an implementation plan in which 7<sup>th</sup> & 8<sup>th</sup> grade students will participate in the hands-on activities and experiences provided by the Mobile Fab Lab.
3. Formation of an implementation plan for follow-up activities and curricular tie-ins to existing academics,
4. Formation of an implementation plan for the use and distribution of grant-purchased mobile devices in relation to the Mobile Fab Lab, and
5. A plan for sustainability for the grant-purchased mobile devices for maintenance, repairs and replacement.
