This graph represents the results from student 1 during the piloting of Comics4Comprehension. As illustrated in the graph, Student 1’s performance on end of story comprehension questions was consistently better when provided with access to Comics4 Comprehension visual supports. On lessons 1 and 2, the student did not receive an opportunity to answer comprehension questions without Comics4Comprehension to allow some ability to control for gains that may simply be the result of increased practice opportunities. As indicated above, Student 1 was consistently able to answer 70% of the End of Story comprehension questions correct when provided with Comics4Comprehension. When no visuals were provided, Student 1 was not able to answer more than 60% of the comprehension questions correct across 3 different lessons.
