To Whom It May Concern,

I am writing this letter in support of the Career Compact program. Having the facility located in Celina, with ample access to local students is invaluable to the community and businesses in need of skilled associates.

As a local business, we are in need of associates that have skills in the production environment. With the Career Compact program, students can learn those skills and be placed in a job with ease knowing they have the skills needed to be successful. Businesses also know they are receiving well trained associates which will then cut their training cost substantially and in the end create a win-win situation for both.

I look forward to seeing the program come to life and benefit from the well trained associates that will have the opportunity to join the TQMF team.

Thanks

A handwritten signature in cursive script that reads "Michelle Suchland".
