

Frontier Local School District

December 1, 2015

To Whom It May Concern:

I am pleased to write this letter of support for the Epicenter Flex Credit program. This will afford our Frontier Local School District students a unique opportunity to create their own learning experience while addressing and completing required core curricular components. We will include this option in the Frontier Middle/High School course book used by our students to schedule their academic career as they work toward graduation. In order to further develop this option and other opportunities for our students, the resources provided by Building Bridges to Careers will be included in our Career Advising Policy. Specifically, this community resource can help train employees on how to advise students and provide students with support as they transition to postsecondary destinations.

Sincerely,

A handwritten signature in black ink, appearing to read "Kevin S. Turner".

Kevin S. Turner

Superintendent
